Hansen Two-Way Shut-Off Couplings seal both ends of line when coupling is disconnected. Spring actuated valves in both socket and plug provide immediate seal against escape of gas or liquid. Couplings can be used for compressed air, hydraulic fluid, liquids, paints, steam, refrigerants, gases, vacuum (limited), and oxygen. LP Gas and Vacuum Service is not recommended for 4-HK, 6-HK, and 8-HK Series Couplers.

Options

- **Sleeve Lock Device**: For Optional Sleeve Lock Device, add suffix “-SL” to the part number.
- **Valve Actuators for One-Way Shut-Off Service**: Sockets or Plugs in some material can be provided with valve actuator in place of Valve Assembly to allow dissipation of pressure upon disconnection. To order add suffix “-VAA”.
- **British Parallel Pipe Thread**: Series 1-HK to 8-HK available with British Parallel Pipe Thread.

Planes are indicated for all parts.
