IW24 IMPACT WRENCH

The STANLEY® IW24 Hydraulic Impact Wrench is renowned for its adjustable impact intensity settings, offering versatility for a wide range of applications. Built with a rugged design, it incorporates an integral motor and heavy-duty mechanism, making it ideal for the demanding conditions of track maintenance. The IW24 delivers an unmatched power-to-weight ratio, ensuring exceptional performance in its class. Additional features include variable speed control for precise torque application, a compact and ergonomic design to reduce operator fatigue, and easy maintenance with fewer moving parts for simplified serviceability. Its durable construction, combined with the ability to adjust impact intensity, makes it the perfect tool for tough, high-demand environments..

IW24 IMPACT WRENCH

FEATURES

- The STANLEY IW24 Impact Wrench is a heavy duty wrench ideal for nut and bolt driving, screw anchor and other heavy impact applications.
- Designed to run from a wide range of hydraulic circuits, the IW24 has adjustable impact intensity making it ideal for a wide range of heavy duty driving
- The large “D” handle and feathering trigger are convenient and gives the operator complete control of the wrench
- The rugged swing-hammer impact mechanism provides easy servicing for reduced maintenance costs and greatly reduces the transmission of torque to the operator reducing fatigue through repetitive tool operation
