- Create gaps for setting a Halligan or hydraulic spreader

**Can't get in?
'Jimmy' it!**

BRO-PB-JIM

The Broco 'Jimmy'[™] is only 10.5" long and weighs less than a half pound. Easy to carry. Easy to use.

• jim·my verb, to force open

Every member of the team, not just SWAT entry guys, should carry a 'Jimmy'[™]. Made from heat-treated hardened steel with high-density foam under a wrapped cord grip for comfort. 'Jimmy'[™] has a striking surface at the back end and a lanyard attaching loop.

This type tactical pry bar was innovated by NYPD ESU entry experts who identified the need for an easily carried multi-purpose tool to assist with forced entry of buildings, rooms and locked furnishings.

Uses include forcing interior doors, windows, and bus windows, breaking glass, punching holes through interior walls and so on. Get under the flange of a security door to make setting a Halligan easier. 'Jimmy'[™] is only 10.5" long and slides into the Molle on a vest for easy carrying.

Made in the U.S.A.
