

3126 OUTER-LOCK COMBO BOX WITH SOUND POWERED PHONE

DESCRIPTION

The Amron International Model 3126 Outer-Lock Combo Box is a small, compact package that supplies all of the electrical and communication requirements for the chamber inside the outer-lock. As part of Amron's "Easy as 1-2-3 System," Model 3126 allows you to set up your chamber communications, auxiliary and electrical wiring with ease, just as the name implies. This system is a complete "off the shelf", pre-tested chamber communication and wiring system for a double lock chamber. The system is designed for installation by non-electrical type personnel and requires only a crescent wrench and a screw driver. This eliminates the engineering and hunting for all the bits and pieces necessary to properly wire a chamber.

OVERVIEW

Features:

- Pre-wired, tested and ready to install
- Electrical Penetrator Adapter with indexing mounting provision
- Chamber talk-back speaker with on/off switch
- Sound powered phone, jack and mounting bracket
- Headset connection wired for duplex Simulcom

- Height: 6 in. (15.2 cm)
- Width: 4.5 in. (11.4 cm)
- Depth: 4 in. (10.2 cm)
- Weight: 7 lbs. (3.6 kg)

DISCLAIMER NOTICE: Amron's chamber communications are designed to be used in air chambers where oxygen concentrations remain below 23.5%. Our communications products (including communicators, speakers, entertainment systems, and other communications accessory items) are NOT designed for oxygen service, are not intrinsically safe, and do not meet the criteria given in NFPA-99, Chapter 20 and other applicable definitions. Misuse of our chamber communicator products in high-concentration Oxygen environments may result in serious injury and/or death.
