

OCEANREEF®  
underwater, naturally.

# GSM | Mercury

## The best. Period.

Foldable. Multichannel. DAT.  
Dual Earphones. Rechargeable.  
Adjustable Volume. Digital.  
Powerful. Integrated.

### GSM | Mercury IS THE NEW GENERATION OF UW TRANSCIVER UNITS

\*Mercury is compatible with all OCEAN REEF units and other brand units on certain channel.

GSM DC's  
all features + new ones

GSM G-Power's  
range & volume control

Exceeds GSM G.Divers'  
battery life

GSM G-Power SL's  
range, volume & stereo setup

## Blending 4 Products into 1

30 hours of battery life.  
Dive all week, on 1 charge.

Logistics for charging might be difficult at times.  
The Mercury has user swappable batteries.  
Take empty one out, put charged one in.

Stop wasting batteries!  
Recharge away - with a standard micro USB  
connector you can juice up the Mercury from  
wall outlets, power banks, computer...

Privacy: 2 channels to separate conversations.

Having been the first to introduce digital uw comms, we always thrive to do better.  
We have improved our quality of communication further than any of our other units.

Packing intelligence.  
Once you are done with your dive,  
just fold the Mercury inside the mask  
for compact storage.

2 is better than 1.  
With 2 speakers,  
communications are  
louder and clearer.

Easy = Durable.  
The Mercury opens by unscrewing a lid.  
Closes by screwing it back into place.  
The whole new PTT integrates the D-Mic.  
To assemble on the mask... guess what?  
You just screw it in.

It's digital.

Long distance relationships: we go the distance.  
As a matter of fact you can communicate with your  
dive buddy at distances exceeding 800ft/250m.

Our first ever voice menu is easy to navigate and  
operating it will be intuitive and fast.
