5. Overall minimal design to reduce weight and maximize ventilation
6. Thermo-bonded chest pocket flap

DESIGN

Engineered specifically for humid, tropical environments, our next generation hot weather Field Apparel features an extremely lightweight, fast-drying nylon ripstop fabric with MCS Blocker™ to wick away moisture and provide UV protection. Two different high-strength ripstop fabrics provide reinforcement in areas of high wear. Pockets lined in mesh for maximum airflow and accelerated dry times. Button closures used throughout for quiet access to items.

Made in the US from US materials.
