9. Drawstring cuff opening

DESIGN

Our lightest, most breathable Field Pant. Engineered specifically for humid, tropical environments, our next generation Hot Weather Field Apparel features an extremely lightweight, fast-drying nylon ripstop fabric with MCS Blocker™ to wick away moisture and provide UV protection. Two different high-strength ripstop fabrics provide breathability and reinforcement in areas of high wear. Pockets lined in mesh for maximum air-flow and accelerated dry times. Designed for use with our removable **AIRFLEX™ IMPACT FIELD KNEE PADS** (sold separately). Overall minimal design to reduce weight and thermal burden. Made in US from US materials. WWW.LWPATENTS.COM
