DESIGN

Our FR Field Apparel features our innovative High Strength Commando™ Twillstop fabric. Constructed with inherently FR fibers, it is incredibly light yet strong. Designed as a tailored utility shirt, the engineered stretch allows for a slimmer cut while maintaining maximum mobility—even under body armor. Chest pockets are low profile with flaps engineered to be tucked in for ease of access. Zippered shoulder pockets reduce bulk while still allowing room for all essential gear. Flame tested on NC State's Pyroman (in accordance with ASTM F1930) for an optimized thermal protection level. Designed for use with our removable AIRFLEX™ IMPACT ELBOW PADS (sold separately). Made in US from US materials. WWW.LWPATENTS.COM
