Kevlar® Nomex®

The U.S. Army Elements™ Jacket + Pant – IWOL is a testament to Massif®'s determination for exceptional performance in the most challenging environments. After being rigorously tested by troops worldwide, this system was crafted with the Massif® Battleshield X® FR fabric featuring WINDSTOPPER® by GORE-TEX® LABS and a fleece lining made from Massif® Flamestretch® with Dupont™ Kevlar® and Nomex® brand fiber to offer inherent flame resistance, unmatched durability, and extreme comfort. The multi-directional stretch, excellent water resistance, and optimal warmth-to-weight ratio make it a superior choice to wear standalone or under a pack or body armor. While functional elements like specific zippered pockets, hand warmer pockets, and a pass-through flap on the Jacket for CVC extraction straps ensure the end user is ready for any situation.
