TA54 HYDRAULIC TAMPER

The TA54 Tamper - a remarkably efficient tool designed for compacting soil around utility poles, signs, and fence posts. With its closed hydraulic system and minimal moving parts, maintenance requirements are low and its lifespan is long. Delivering 1,600 blows per minute with a 2-1/2 inch stroke, it ensures optimal compaction while remaining easily repositionable. This tamper creates a solid and stable foundation by reducing air pockets and increasing soil density, effectively preventing shifting or leaning over time and providing essential stability and support for structures.

TA54 HYDRAULIC TAMPER

FEATURES

- The long stroke keeps the TA54 above the fill making it easy to reposition the tool
- Only 2 moving parts
- Depending on model the TA54 is furnished with a 3 x 8 inch kidney foot, a 4 or 6 inch diameter round shoe or a 4 x 8 inch rectangular shoe can be ordered as options to the base model
