

STANLEY®

CO25 CUTOFF SAW

The STANLEY® CO25 Cut-Off Saw is a powerful and versatile hydraulic cutting tool designed for tough applications involving metal or concrete. Compatible with standard 14-inch (355.6 mm) abrasive wheels and wet or dry diamond blades, it adapts easily to various job site needs. The CO25 features an internal blade brake for enhanced safety, quickly stopping the blade after the trigger is released. It also includes integrated water attachment ports for dust suppression and wet cutting, supporting cleaner operation (quick couplers sold separately). Built for durability and precision, the CO25 is ideal for construction, demolition, and utility work where performance and reliability are critical.

CO25 CUTOFF SAW

FEATURES

- Lightweight and powerful, the STANLEY® CO25 Cutoff Saw is ideal for cutting concrete, masonry, pipe, structural steel beams and guardrail
- The STANLEY® saw cart with a CO25 makes the ideal tool combination for accurate dimensional cutting of concrete flat work
- Heavily weighted frame of the STANLEY® saw cart provides a stable platform for slab cutting. Handle-mounted control provides convenient adjustment of cutting depth
- Internal blade brake slows spindle rotation upon release of trigger to greatly reduce wheel coast time
