

Tescom™ SD-X Series Short Diving Regulator

Engineered to Redefine Reliability and
Maximize Diver Safety, Dive After Dive.

Optimized Air Supply

When every breath counts, equipment failure and unstable air supply are unacceptable risks in commercial diving. The Tescom SD-X Series is the essential tool for demanding underwater environments, designed to transform potential hazards into predictable performance. We provide the comprehensive technology and expertise required to keep divers safe, focused, and productive.

- **Consistent Air Supply**

STOP worrying about unreliable pressure. Engineered with advanced sealing technology, the SD-X minimizes leaks and maintains stable outlet pressure, preventing dangerous fluctuations as surface pressure drops.

- **Enhanced Safety**

MITIGATE the risk of equipment failure. A consistent, breathable air supply is a non-negotiable safety feature, providing a reliable and predictable system for critical operations.

- **Increased Operational Window**

MAXIMIZE your operational time. By efficiently utilizing remaining air—rather than losing it to leaks—this regulator extends the diver's working period, allowing for longer, safer dives.

Tescom SD-X: Technical & Reliability Proof Points For Integration

The SD-X Series redefines reliability for commercial diving. With advanced pressure control in a compact design, it ensures a steady, breathable air supply when it matters most. Built for harsh environments, it empowers longer, safer dives—delivering performance you can trust, dive after dive.

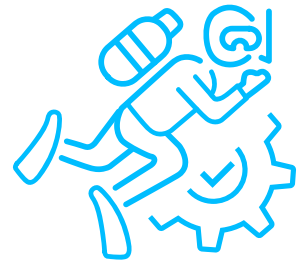

Consistent Air Supply

- Unmatched Pressure Control Performance.
- High-performance from 5 psi / 0.35 bar up to 400 psi/ 27 bar selection.

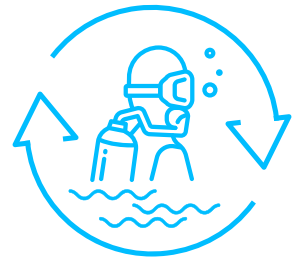

Enhanced Safety

- Engineered specifically for the commercial diving industry
- Built to withstand the most demanding environments.

Increased Operational Window

- Optimal air pressure control increases remaining usage of remaining air, allowing longer periods of diving time.
- Advanced sealing technology minimizes leaks, meeting a Bubble tight leakage specification.
- Diving portfolio offering robustness, coupled with a compact design that simplifies system integration.

Optimize your operations and trust in a reliable system.
