

# CONSOLES AND GAUGES

## Suunto Analog 2 Depth Gauge

5254

This analog depth gauge features luminous easy-to-read analog dials with depth and pressure gauges. Built for reliability with accurate open bourdon tube mechanism.

### Features

- Luminous easy-to read analog dials
- Reliable and accurate open bourdon tube mechanism
- Maximum depth indicator

## Sherwood Submersible Pressure Gauge

PG060A

These rugged pressure gauges use spiral-wrapped Bourdon tube movements for excellent shock resistance and the dial layout is uncluttered and easy to read. An excellent choice for a fundamental instrument, this pressure gauge has a 7/8 inch threaded hose with 360° swivel gauge end including a hose protector.

### Features

- Imperial - 0 to 5000 PSI
- Analog pressure gauge with temperature indicator

### Submersible Pressure Gauge

PG060A	0-5000 PSI
PG060MA	0-400 BAR

## Sherwood Compact Navigational Console

SW-CG3200

These reliable consoles provide outstanding accuracy and durability. With the depth gauge and compass on the same side, depth and direction are easily monitored simultaneously. The compass is mounted at an angle above the side-reading depth gauge, for gun-sight accurate navigation. The pressure gauge is located on the flip side.

### Features

- Liquid-filled compass top and side reading
- Analog depth gauge 0 - 200 ft. with max depth indicator

BACK VIEW

## Sherwood 200 Foot In-Line Console

CG-5336

The CG5336 200 feet In-Line Console features a three large easy-to-read gauges in an ergonomically designed unit.

### Features

- 0-200 ft. Air filled depth gauge
- Maximum depth indicator
- 5000 PSI pressure gauge with temperature
- Side-view Compass
- The New Supertilt (Maxtilt) compass can be held to a 30 degree angle underwater and still be accurate.
